Agenda

- **Mobile Trends**
- **iMIS Mobile Solution Overview**
- **Benefits of a Mobile App**
- **Q&A**

Mobile Trends

50+% of all **web traffic** comes from **mobile devices**

90+% of time on mobile devices is spent using **apps ... app usage is up 20% since COVID-19**

50+% of the global workforce are **Millennials & Gen Z**

Average person **spends 5.4 hours on their phone ... Baby Boomers spend 5**

Mobile Trends

Consumers have grown to expect access to everything through mobile. Anything beyond that is now considered inconvenient. **Inconvenience directly leads to disengagement.**

Banking

Communicating

Entertainment

Dating

Food Ordering

Shopping

Ridesharing

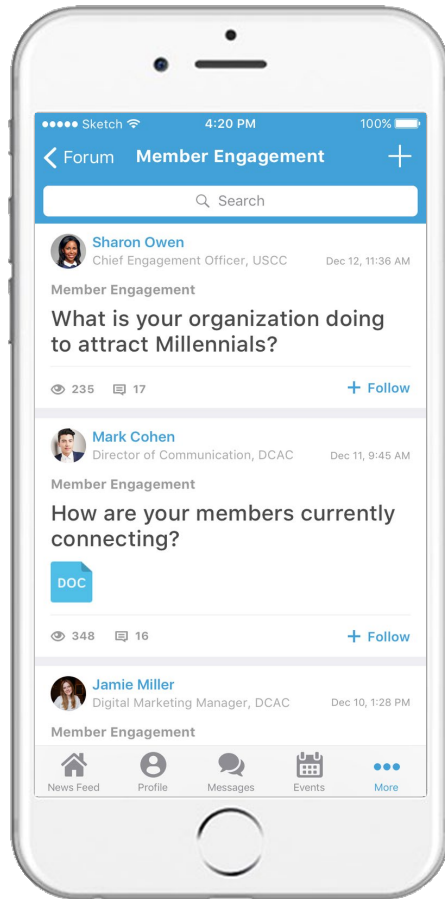

Traveling

News

Solution Overview

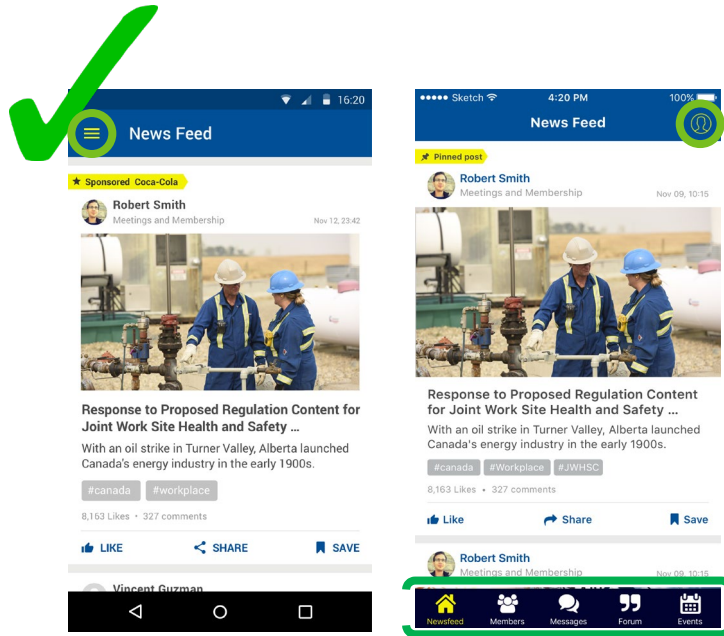

- **100% Native App:** iOS and Android native apps
- **Personalization:** branding, buttons/icons, navigation
- **Integration:** iMIS (Profile & Event) & RSS Feeds
- **Key Modules:** News, Profile, Directory, Notifications, Messaging, Forum, Resources, Events, Advertising
- **Custom Links:** Link to any web-based resource or tool
- **Clowder Client Success:** implementation, integration, ongoing support, and app upgrades

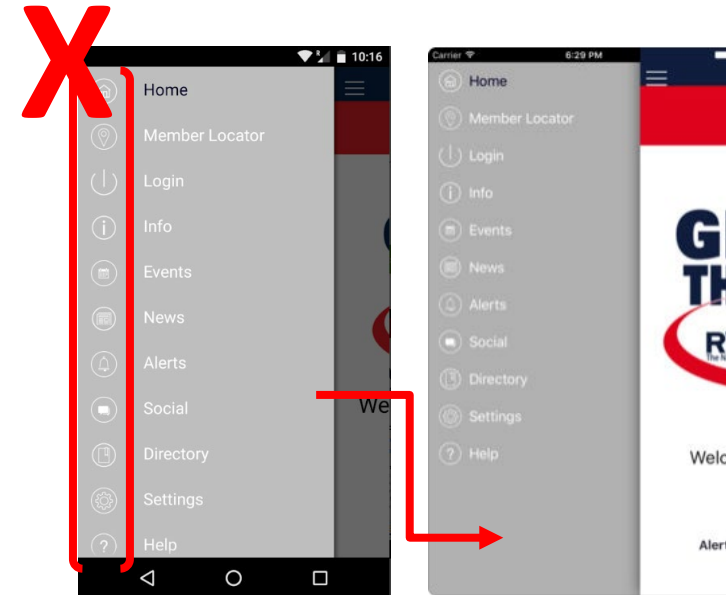

Solution Overview: Native App vs. Web App Technology

App Feature	Native	Web
Is designed specifically for the mobile operating system (iOS/Apple or Android/Google)	✓	✗
Can directly access device hardware (bluetooth, camera, touch ID, face ID, GPS, etc.)	✓	✗
Follows the respective user interface design guidelines from both Apple and Google	✓	✗
App guaranteed to be available through the Apple and Google Play stores and therefore easier to find	✓	✗
App supports secure API integration approach including SSL encrypted endpoints, avoidance of cached content, and additional verification for payments	✓	✗

Solution Overview: Native App vs. Web App Technology

Native app platforms require you to use **different** navigation bars, icons and standard best practice designs based on their interface guidelines

Per Apple and Google guidelines, going forward, apps that use the **same design** for both iOS and Android are at risk for being **removed** from the app stores

Solution Overview: Personalization

✓ Filters
✓ Button Text

✓ Tap bar icons
✓ Tap bar name
✓ Tap bar order

✓ Additional tap bar web views

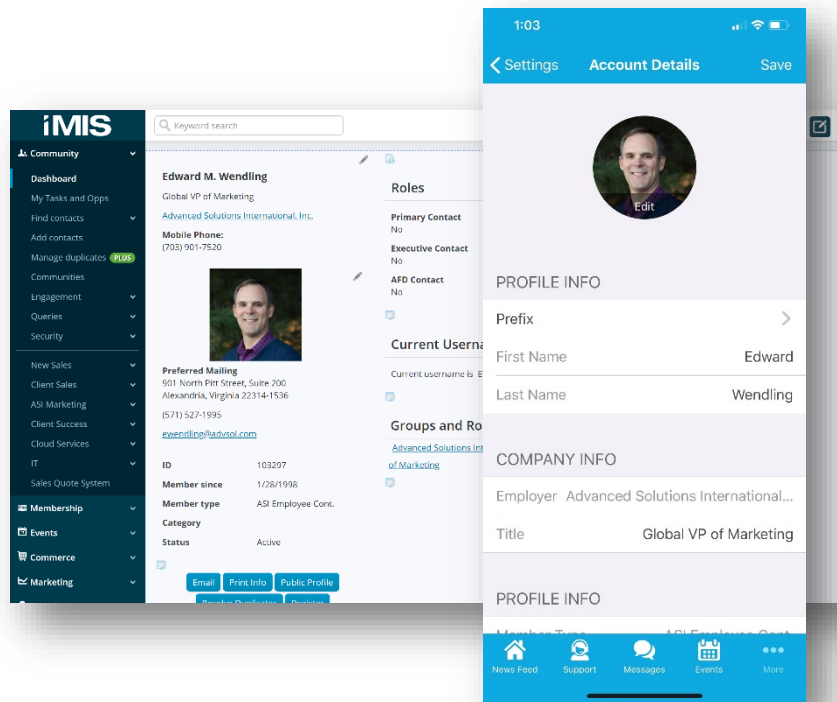

✓ Splash screen
✓ Color scheme

The image displays three mobile app screenshots with red annotations. The first screenshot shows a 'Members' list with a filter icon highlighted in a red box. The second screenshot shows a 'Vote' button and a 'Share' link, both highlighted in a red box. The third screenshot shows a 'More' menu with 'Legislative Updates' highlighted in a red box. A fourth screenshot shows a splash screen with a blue background and a white logo, also highlighted in a red box. Red arrows point from the text annotations to the corresponding elements in the screenshots.

Profile Information

Event Details

Solution Overview: Key Features

News

Keep your members in the know with a rich stream of news, polls, RSS feeds, and user-generated content.

Profile

Make it easy for your members to manage their account, schedule events, renew dues, and more.

Directory

Create a digital rolodex of members searchable by name, type, geolocation, and more.

Notifications

Break through the clutter with instant alerts to members, committees, or other work groups.

Messaging

Provide members with a modern way to communicate via one-to-one or group chats.

Forum

Offer a convenient option for your members to connect, collaborate, and share ideas.

Events

Support unlimited events with agendas, session surveys, attendee lists, sponsor info, and more.

Resources

Provide your members with a convenient digital hub for your most important and relevant resources.

Advertising

Develop a new revenue stream through digital display ads, sponsored content, and sponsored events.

Custom Navigation Links

Improve convenience and accessibility for your members by providing custom navigation links to key resources like your Career Center, Educational Offerings, and more.

Integrated Sub-Groups

Target and manage access to content throughout the app based on data (i.e. Chapter, Committee, etc.) in your iMIS database.

Chapters Management

Allows individual chapters the ability to manage their own news, push notifications, events, forum topics, resource folders, and advertising.

Solution Overview: Clowder Client Success

- All-inclusive pricing + service: \$0 implementation, regular app updates + ongoing support
- Dedicated Client Success Manager
- 90-120 implementation timeline
- Ongoing app promotion and adoption advice + best practices library
- Quarterly meetings to review your content strategy, promotion plan, and app usage metrics

Clowder
Mobile engagement year-round

Calendar for App Promotion - Event Launch

Promotion drives downloads. Content then drives retention (see Content Calendar). Continued promotion must be made a priority. Your network should not just be told to download the app, but shown *why* they should. Use the below outline as a guided example of the frequency in which you should be promoting your Clowder™ app:

Month 1

SUN	MON	TUES	WED	THURS	FRI	SAT
	1	2	3 BEGIN PROMOTION	4	5	6
7	8	9	10 CONT. PROMOTION	11	12	13
14	15	16	17 FEATURE HIGHLIGHT	18	19	20
21	22	23	24 RE-ENGAGEMENT	25	26	27
28	29	30 END PROMOTION				

Month 2 & Beyond

SUN	MON	TUES	WED	THURS	FRI	SAT
			1 EVENT DAY 1	2 EVENT DAY 2	3 EVENT DAY 3	4
5	6	7	8 RE-ENGAGEMENT	9	10	11
12	13	14	15 FEATURE HIGHLIGHT	16	17	18
19	20	21	22 RE-ENGAGEMENT	23	24	25
26	27	28	29 RE-ENGAGEMENT	30		

Timeline Breakdown:
You should begin the promotion of your app about 1-2 months prior to your event. This allows enough time for members to begin exploring the app and utilizing it for event preparation (e.g. saving and building agendas). Promotional efforts should include app screen images, your promotional video created by Clowder™ and information on how the App will enhance the event experience.

Remind your network **at least once a week** as you're leading up to the event, and especially the **day before** of all the benefits and advantages the app provides. Keep it up all week.

Heavily promote on the first day to create event-wide excitement. Carry that excitement into the remaining event days to increase significant downloads and usage.

For at least 3 weeks post-event, schedule weekly follow-up email campaigns to promote the app year-round benefits and why it is important to keep it on your agenda.

Once users have had a few weeks to explore the app, requesting their **feedback** is a great way to gather feedback on what is working well and what can be tweaked. It shows users your appreciation and a goal that is to bring long-term value.

App promotion should **never stop**. Continue to integrate it into your social media and email strategy. Don't always promote content. Be selective in what events found in the app as well as any new updates. Visit on the app to your network **at least once a week**. This keeps retention high.

*All apps and promotional strategies are unique. Please ensure you follow up with your Client Success Manager with any questions for optimal results.

But that's fine. We play even BETTER as underdogs! 🏆🏆

Glad you've finally seen the light Edward! 😊

Tara Lanhm

Clearly, mine, like Debbie's is correct

so to be truly safe and sure... one week at the beach. two weeks self isolating at home. 3 weeks off total. Paid?

Like 1 Like · 1 Reply Reply

TK Dr. Thomas Kosick 2 months ago

how about paying for employees testing and getting them back to work in 2-3 days?

LG Dr. Lindsey George 2 months ago

We have mentioned they should get tested when back (has not went yet) I believe the testing for Covid-19 is free.

The antibody test runs \$200 I believe although.

3 weeks paid for a vacation now?, wowsers! Yet alone the scheduling conflicts to get through.
